AN APPEAL ANSWERED. Some time since a description of the sad case of invalidism of Miss Frank Thomas, a young lady of this place, who for fifteen years has been powerless to move any part of her body, though not totally paralyzed, was given in this cor-respondence. She is an orphan, without respondence. She is an orphan, without any close ties of blood, and her helps lessness, patience, and resignation appeal to all who see or hear of her. Within the past year she has made some decided improvements, that suggest the hope that she may gain still more with skilled treatment and nursing. For this object, some time since an appeal was made through Dr. T. R. Marshall, of Bedford, who has recently received the appointment of Demonstrator of Anatomy of the Medical College of Virginia, in Richmond, to obtain admission for her into a hospital of your city, famed for its noble charities. On Thursday the welcome tidings came that the "Shel-tering Arms" had consented to receive the patient sufferer, and endeavor to amellorate at least her pitiable condition.
The Charity Circle of King's Daughters,
with the sympathy of the entire community, arranged for the details and
expense of delivering her at the hospital, and Mrs. Mary Fizer, who is known as the Good Samaritan of the place. kindly volunteered to undertake the diffi-cult task of accompanying her on the journey. She will be carried on a cot, as she cannot sit. The young lady is very ppreciative of the interest and efforts in her behalf. She is very interesting and intelligent, and has many friends.

INTERESTING CASE,

By far the most interesting case tried and one which has attracted a great deal of attention throughout the county was that of the Commonwealth against J. W. Longerbeam alias Huldy Longerbeam. In July, 1895, Longerbeam, who belongs to an old family in the county, and has hitherto borne an unsullied reputation, purchased of the Huber Manufacturing Company, of Ohlo, through its agents, a threshing machine, and gave them as security for the deferred payments a deed of trust on a house and lot. It now appears that the house and lot is the property of Longerbeam's father, hence the indictment charging Longerbeam with obtaining goods under false pretences. Longerbeam's defence is that while he admits that he owes the comwhile he admits that he owes the company for the machine and gave a deed of trust, he understood that it was on the machine only, and being unable to read, did not know the conteins of the deed of trust; and further, that the company cannot prostitute the criminal laws of Virginia to force a collection of its of Virginia to force a collection of its debt. The Commonweath and the company are represented by C. M. Brown and A. Moore, and the defence by F. B. Whiting and Marshall McCormick, and the case is being very hotly contested, and will last probably a day longer. Large crowds of people have been in attendance upon each day's session of the court, and a great deal of interest has been shown. Among the attorneys present from a distance were Messrs. M. M. Lynch, Robert M. Ward, and W.

R. Alexander, of Winchester, and Floyd Price, of Leesburg. At the invitation of J. E. B. Stuart Camp of Confederate Veterans. General Thomas J. Munford, of Lynchburg, will deliver an address here on May 10th, the anniversary of "Stonewall" Jackson's

SUGAR-BEETS.

The Experiment of Raising Them to Be Tried Near Cape Charles.

ONANCOCK, VA., April 19.—(Special.)—Captain Orris A. Browne, agent and manager of the famous Hollywood Place manager of the famous Hollywood Place, near Cape Charles, is making arrangements to start a new industry on the Eastern Shore of Virginia, which, if successful, will be a great boon to this section. He will during the coming season make an experiment in growing sugar-beets on Hollywood Place which is, the largest truck farm in Virginia; and if the experiment succeeds, he will distribute the seed among the farmers of the Eastern Shore during the coming year, and will have erected at Cape of the Eastern Shore during the coming year, and will have erected at Cape Charles a sugar factory, costing about \$200,000. During the past week Mr. Theodere A. W. Havemeyer, the great sugarking, and other capitalists of Philadelphia came over from Old Point in a special steamer to visit Capitaln Browne and discuss the matter. They are reand discuss the matter. They are rewhat they saw and heard, and are of the opinion that the conditions prevail-ing here are very favorable to the suc-cess of the proposed industry. It is es-timated that there is something between Northampton in excellent condition, lying in close proximity to the New York, Philadelphia and Norfolk rail-York, Philadelphia and Norfolk rail-road, and in every way suited to the production of sugar-beets. These lands have heretofore been utilized mainly in the production of sweet potatoes, which for the last few years have proved to be an unprofitable crop. For many years past Irish potatoes in Northampton and sweet potatoes in Accomac have been sweet potatoes in Accomac have been the great staple crops of this section, but the low prices prevailing for the last three or four years have convinced the more thoughtful farmers that they must look to other crops if they excep to keep their heads above the wate Captain Browne, who is one of the mo-Captain Browne, who is one of the most progressive and public-spirited men of the State, was among the first to recognize the fact, and in the management of the Hollywood farm he has been enabled to make experiments and introduce new crops that have been of great benefit to the farmers of this section.

The great trouble with the people of the Fastern Shore is that the peculiar

The great trouble with the people of the Eastern Shore is that the peculiar style of farming and trucking pursued here has rendered it a very difficult thing for the farmers to abandon their me-thods and turn their hands to crops that require different methods of cultivation No wheat is grown in these two coun ties, and the cultivation of tobacco which had declined even in the Colonial period, is now among the lost arts. One gentleman, who has a fine farm near this town, attempted to raise some to-bacco last year, and he allowed it to get about six feet high and in full bloom before he undertook to top it. One great advantage of the proposed new indus-try is that it will require no revolution in farming methods and no great outlay in preparing for the crop. It is be-lieved that the soil contains sufficient saccharine matter to produce sugar-beets of excellent quality, and the ease with which the land can be cultivated with which the land can be cultivated and the small expense in carrying the beets to the factory give great encouragement that the industry will be successful from the start. It will, at least, emancipate the people of the Eastern Shore from the cruel tyranny of potato culture, and rive them any other crop culture, and give them any other crop to rely on. Those who have carefully investigated the matter have no doubt that the experiment is going to prove successful, and that it will inaugurate a new era of prosperity on the Eastern

Shore of Virginia.

The mad-dog excitement is still running high in the Mappsville neighborhood.

There are two kinds of merchants-those who exaggerate and those who don't. Which do you believe? The one that exaggerates always claims an offering to be worth double, or almost double, the price he asks; whilst the latter bases the worth of his goods on actual value. Thus there are two kinds of bargains-the sham and the genuine. Bargains advertised Monday can be purchased here any day in the week-if they are still in stock.
